

Architectural Styles and the Forces That Shaped Them

Historical architectural styles are significantly shaped by the social and technological developments of their respective eras. A knowledgeable student of history will be able to identify the era in which a building was constructed using information regarding its structure, ornament and materials. The presentation is developed for a nonprofessional audience. The audience will be introduced to the architectural styles of three different eras between 1830 and 1930 and will explain influence of the factors that shaped the Greek Revival, Queen Anne and Modern styles. Alternate style options include with Craftsman, Tudor and Colonial Revival styles.
