

Green Lean and Adaptive: Designing with the Future in Mind

This presentation reviews the connections between sustainability efforts, lean operations and adaptive spaces. While each could be a separate topic, the thesis is that they are inherently linked to one another and form a strong foundation for a triple bottom line.

Learning Objectives

- Review the current state of sustainable efforts in design
- Define some of the basic characteristics of lean operational techniques and how they relate to business.
- Review strategies for improving flexibility of facilities
- Show how these three topics are interlinked and can drive the triple bottom line of people, planet and profit for an organization.

Presentation Details:

Speaker's Name: Kimberly N. Montague, AIA, EDAC, LEED AP

Phone: 248-880-9851

Email: kimberly_montague@hermanmiller.com

Target Audience: Business and Professional

Audio/Visual equipment: screen, projector

Time Required: 1 hour minimum

Travel limits for the speaker: 150 miles from Detroit area

Best time of year: Anytime but Early June, mid-November - not available
