Job Opportunity: Project Architect / Project Designer

END Studio is seeking a Project Architect / Designer with 5-10 years of experience to join our team!

The position is expected to be full time and salaried, with a hybrid schedule requiring work in our Detroit office coupled with the option for some remote work. Compensation is commensurate with experience. END Studio offers health insurance, holidays and PTO, professional development stipend, lunch and learns, team art field trips, and a fully stocked snack drawer. We believe in a happy and healthy work environment that supports its employees to be inspired, empowered, and enjoy the work they do.

ABOUT END STUDIO

END Studio is a Detroit-based architecture and design practice dedicated to engaging unexpected contexts and exploring playful techniques to transcend the traditional architectural experience. As a woman-owned business, we are dedicated to diversity in our business practices and to creating equitable and empowering spaces for all people and populations. We believe strongly that space should be egalitarian, and that good design should be available to all, and we are committed to making the city a more sustainable, enjoyable, and inspiring place. END Studio is currently working on a number of hospitality, nonprofit, arts and cultural, and custom residential projects.

RESPONSIBILITIES

- Manage and lead the design of 2-3 projects at a time, including management of design teams, project schedules and budgets
- Assist with design, detailing, and drawing of other projects in the office
- Coordinate directly with clients, consultants, and contractors throughout design
- Construction administration, including site visits, RFI's, and submittal review

REQUIREMENTS

END Studio is a small office with a strong focus on collaboration, and we look for team members who are excited to explore, experiment, and co-create with us. The right candidate will be versatile, thoughtful, and creative with the ability to synthesize aesthetics and technical detail into great design. The candidate should be highly motivated with ability to self-manage and balancing a variety of projects and tasks. Strong communication skills, leadership ability, and the ability to manage other team members are required. A thorough understanding of construction documents, detailing, structure, building systems, zoning, and building code is expected. The candidate should have a professional or master's degree in architecture and 5-10 years of experience. Architecture licensure is preferred. Proficiency in Revit, AutoCAD, Rhinoceros, and Adobe Creative Suite are required. Design-build or fabrication experience is a plus.

APPLY!
